#### **The Bad Impact of Using Plastic Bag**

You use plastic bags when you go shopping, but what happens to them afterward? You might not think it is a big deal to use plastic bags, but just think of how many people around the world are also using them. Plastic bags are so bad for the environment and therefore there are good reasons why we should ban plastic bags.

Plastic bags are contributing to global warming. Most plastic bags are made out of a substance called polyethylene. It is not just that plastic bags are contributing to climate change. They are also filled with toxic, harmful chemicals that include estrogen-like substances. This is produced from natural gas processing and crude oil refining, as Green Tumble reports, which are non-renewable fossil fuels that produce greenhouse gasses – a huge culprit of global climate change!

Another good reason to stop using plastic bags is that they are toxic. In an Environmental Health Perspectives report, when 450 plastic items, including flexible bags, were studied, it was found that over 70 percent of the plastic products released chemicals that mimicked estrogen. This is dangerous because it means that the plastic has hormone-mimicking qualities. These disrupt how hormones, such as but not limited to estrogen, behave in our bodies and this gives us a hormonal imbalance that can have serious effects on our health.

We should stop purchasing plastic bags and start using any environmentally friendly options instead. Your health and the planet will thank you.

### **Why Exercise is Important?**

The majority of us claim that we do not have time for exercise. We feel too busy to do that. However, many experts says that exercise has great role in making our body healthy.

Being physically active offers many advantages. In physical rewards, exercise can help reducing body weight and making our body fitter. Exercise is also believed to reduce stress levels, improve sleep patterns, and reduce the risk of heart disease, diabetes, and some forms of cancer. Besides physical advantage, exercise also brings good effects mentally. Due to the fitter body, exercise can make us feel refreshed and happy, increasing our life quality and expectancy.

How can we exercise while we are busy? Such question is commonly found among us. Actually, exercise can be done in simple ways. We can go walking while shopping. We can take the stairs rather than lift at the office. Or we can go cycling while enjoying our leisure time.

After all, doing exercise is difficult in a busy life but a little exercise will help us feel better.

#### **The Importance of Mobile Phones in Daily Lives**

I strongly believe that mobile phones are necessary. My reasons for this belief are that these phones are convenient for business people who travel a lot, and they are handy for emergencies.

To begin with, mobile phones are necessary in the case of emergencies. For instance, if you fall down a set of stairs in a building and are badly injured and can't reach a pay phone, it is handy to have one to use. If your car breaks down in the middle of the night in a strange neighborhood, it would be dangerous to leave it in search of a public phone booth.

My other main reason is that mobile phones are convenient for business people. For example, if you are out of the state or even overseas and you have to contact a client to do some important work, it is useful to have one to use. By using a mobile phone, important information can be received. People can't stay in an office all day waiting for their phone to ring. Some people have to go and do jobs or they will go out of business. You can even send faxes or messages and use the internet with your mobile.

In conclusion, I believe that mobile phones have now become a necessary part of every day life. Instant communication will ensure that information can be passed on with a simple press of a button. Whether this is to do with business or personal information or emergencies, it goes to show that they are necessary in the new millennium.

### **Never Try Smoking**

A (31).... of people, especially teenagers, who do not smoke, always want to (32).... smoking. They know it is bad for them and all, but it is just something they want to try. So they ask one of their smoker friends for a cigarette.

Admittedly, they firstly cannot fight it on their own so they ask his friend to do it. Then they inhale that cigarette and smoke occasionally.

### 01 Definition of Analytical exposition text

Analytical Exposition is a text that elaborates the writer's idea about the phenomenon surrounding.

### 02 Purpose of Analytical exposition text

The purpose is to persuade the reader that the idea is an important matter.

### 03 Generic structures :

- **Thesis** : Introducing the topic to be discussed in the text.
- **Arguments** : Providing supporting arguments based on logical facts or data.
- **Reiteration / Conclusion** : Reminding readers of the author's opinion and providing a strong conclusion.

### Smoking in Restaurants

Smoking in restaurants is not ok. It must not be allowed because it is rude, harmful to others and dangerous not only for the nonsmokers but the smokers as well.

Firstly, smoking in a restaurant is impolite. The smell of the smoke affects all people and can turn them off their food. People pay to taste good food and should not be put off by foul smelling smoke.

Another reason smoking should not be allowed in restaurants is the harm it can do to others. Passive smoking, that is breathing in smoke made by a smoker, can lead to asthma attacks and even cancer. Finally, smoking is dangerous and a health risk to smokers. Cigarettes can cause heart and lung disease.

Therefore, smoking in restaurants is impolite, harmful to others and a health risk to everyone. It is better if smoking is not allowed in any restaurants.

Title: Why School Uniforms are Important for Students

School uniforms play an important role in education. There are some clear reasons why the implementation of school uniforms is crucial for schools.

Firstly, wearing a uniform fosters discipline and orderliness. When all students wear the same uniform, they will focus more on their studies rather than fashion preferences. The uniform also makes students appear neat and professional.

Secondly, uniforms promote equality among students. Richer and poorer students will appear alike in similar uniforms. There will be less discrimination or bullying based on their economic backgrounds.

Finally, the uniform reflects the identity and values of the school. Students will nurture the attitude to be proud of their school when wearing the uniform. It represents unity and becomes the school's identity to the public.

In conclusion, school uniforms give a positive impact on student development and school image. The uniforms represent discipline, equality, and school pride. Therefore, all schools ought to make wearing uniforms mandatory.

Coconuts

Do you know coconuts? Ehmm... well, today I'd like to tell you about coconuts. Coconut is a popular kind of fruit, that is produced by a tall palm tree that grows in tropical areas. It is an oval nut which has a large fibrous husk. It has smooth green, reddish, or yellow skin. Inside the nut, there is a thick white meat that surrounds a central cavity. When it is still fresh, the cavity is filled with liquid. The liquid tastes and smells special.

The young flesh of the white meat and the liquid can be made into many kinds of delicious drinks. However, when it is old and the meat hardens, the flesh can be squeezed for coconut milk, that is useful for many purposes. The milk can be for making cakes, drinks, dish, etc.

The tree has unique parts, all of which are useful. The leaves can be for a mat, roof, broom, and so on. The trunk can be for wood logs of many purposes. The tree can also be carved for ornaments and handicraft. In short, the fruit and the tree are all useful for human beings.

There are many varieties of coconut, which have specific tastes and uses. The liquid of some coconuts can be for poison neutralizer. The sizes are also various: small, medium, and large. Coconut trees are planted and grown in tropics. Therefore, in such countries as Indonesia, Malaysia, and neighboring countries there are thousands of coconut trees.

#### Is it good to staff students with a great amount of homework

Homework can exercise students to strengthen their language competence based on the skill they learn at the school, but staffing students with a great amount of homework is not good for their psychology.

The first reason is that with a great amount of homework, students can feel frustration doing their homework. This frustration happens because they have no time to get relax from thinking. They always use their brain to think hard on their accomplishment of their homework and make them tired.

The second reason is that students can feel anxious because they have to do all their homework before the deadline over. Anxiety makes them frustration, too. They cannot sleep well along night.

The thirdly, the students cannot use their spare time for playing with their friends anymore. They cannot give their time to help their parents at home. Their lives are burdened with plenty of homework. Students also need time to express their ideas freely.

From those reasons above I conclude that staffing students with a great amount of homework should not be done even though homework functions to exercise students' competencies and helps them mastering their lessons.

#### 1.The Importance of Speaking English

Conventionally, students need book, pen, eraser, drawing book, ruler and such other stuff. Additionally, in this multimedia era, students need more to reach their progressive development. Students need mobile keyboards to record every presented subject easily. Of course it will need more cost but it will deserve for its function.

First, modern schools tend to apply fast transferring knowledge because the school needs to catch the target of curriculum. Every subject will tend to be given in demonstrative method. Consequently students need extra media cover the subject. Since there is a laptop on every students' desk, this method will help student to get better understanding.

Secondly, finding on appropriate laptop is not difficult as it was. Recently there is an online shop which provides comprehensive information. The best is that the shop has service of online shopping. The students just need to browse that online shop, decide which computer or laptop they need, then complete the transaction. After that the laptop will be delivered to the students' houses. That is really easy and save time and money.

From all of that, having mobile computer is absolutely useful for students who want to catch the best result for their study. Buying laptop online is advisable because it will cut the price. This online way is recommended since online shop also provide several laptop types. Students just need to decide which type they really need.

English nowadays has an important role in our daily life. It is the massive means of communication. Is there a strong argument which says that English will not give any benefit? Learning to speak English well may be the best way to improve our life. It seems all the people in the world have agreed to use English to talk to each other. About 1,500,000,000 people in the world speak English. While another 1,000,000,000 are still learning English.

If we can communicate in English, we can contact people from all over the world. We can talk about our ideas and opinions on Internet discussion groups. We can chat with other interesting people to learn about their life and culture.

If we can communicate in English, we can travel more easily. English is spoken in more than 100 countries. If we lost, we can ask directions or ask for help. Who knows, English will save our life somewhere someday.

That is why we should make every effort possible to find somebody to speak with. Where can we find people who can speak English with us? We can find them at school, shopping mall, tourist destination, etc.

Above all, don't be afraid to speak English. We must try to speak, even if we make mistakes. We cannot learn without mistakes. So, speak English as much as possible!

Title: Why School Uniforms are Important for Students

[Thesis]  
School uniforms play an important role in education. There are some clear reasons why the implementation of school uniforms is crucial for schools.

[Argument]  
Firstly, wearing a uniform fosters discipline and orderliness. When all students wear the same uniform, they will focus more on their studies rather than fashion preferences. The uniform also makes students appear neat and professional.

Secondly, uniforms promote equality among students. Richer and poorer students will appear alike in similar uniforms. There will be less discrimination or bullying based on their economic backgrounds.

Finally, the uniform reflects the identity and values of the school. Students will nurture the attitude to be proud of their school when wearing the uniform. It represents unity and becomes the school's identity to the public.

[Reiteration]  
In conclusion, school uniforms give a positive impact on student development and school image. The uniforms represent discipline, equality, and school pride. Therefore, all schools ought to make wearing uniforms mandatory.

#### Is it good to staff students with a great amount of homework

Homework can exercise students to strengthen their language competence based on the skill they learn at the school, but staffing students with a great amount of homework is not good for their psychology.

The first reason is that with a great amount of homework, students can feel frustration doing their homework. This frustration happens because they have no time to get relax from thinking. They always use their brain to think hard on their accomplishment of their homework and make them tired.

The second reason is that students can feel anxious because they have to do all their homework before the deadline over. Anxiety makes them frustration, too. They cannot sleep well along night.

The thirdly, the students cannot use their spare time for playing with their friends anymore. They cannot give their time to help their parents at home. Their lives are burdened with plenty of homework. Students also need time to express their ideas freely.

From those reasons above I conclude that staffing students with a great amount of homework should not be done even though homework functions to exercise students' competencies and helps them mastering their lessons.

### Language

Laptop as Students' Friend

#### I.The Importance of Speaking English

Conventionally, students need book, pen, eraser, drawing book, ruler and such other stuff. Additionally, in this multimedia era, students need more to reach their progressive development. Students need mobile keyboards to record every presented subject easily. Of course it will need more cost but it will deserve for its function.

First, modern schools tend to apply fast transferring knowledge because the school needs to catch the target of curriculum. Every subject will tend to be given in demonstrative method. Consequently students need extra media cover the subject. Since there is a laptop on every students' desk, this method will help student to get better understanding.

Secondly, finding an appropriate laptop is not difficult as it was. Recently there is an online shop which provides comprehensive information. The best is that the shop has service of online shopping. The students just need to know that online shop, decide which computer or laptop they need, then complete the transaction. After that the laptop will be delivered to the students' houses. That is really easy and save time and money.

From all of that, having mobile computer is absolutely useful for students who want to catch the best result for their study. Buying laptop online is advisable because it will cut the price. This online way is recommended since online shop also provide several laptop types. Students just need to decide which type they really need.

English nowadays has an important role in our daily life. It is the massive means of communication. Is there a strong argument which says that English will not give any benefit? Learning to speak English well may be the best way to improve our life. It seems all the people in the world have agreed to use English to talk to each other. About 1,500,000,000 people in the world speak English. While another 1,000,000,000 are still learning English.

If we can communicate in English, we can contact people from all over the world. We can talk about our ideas and opinions on Internet discussion groups. We can chat with other interesting people to learn about their life and culture.

If we can communicate in English, we can travel more easily. English is spoken in more than 100 countries. If we lost, we can ask directions or ask for help. Who knows, English will save our life somewhere someday.

That is why we should make every effort possible to find somebody to speak with. Where can we find people who can speak English with us? We can find them at school, shopping mall, tourist destination, etc.

Above all, don't be afraid to speak English. We must try to speak, even if we make mistakes. We cannot learn without mistakes. So, speak English as much as possible!

**Should People Shop in Online Shop?**

Nowadays, the activity of online shopping has risen steadily around the world. It has become a new lifestyle for people in modern city since 21st century. Even though there are still many people who prefer buying their daily needs in a market to shopping online, shopping online for certain people have more advantages than its drawbacks.

There are strong arguments in favour of online shopping. For some people, particularly working people, they argue that the existence of online shop is very utilitarian in their life.

That is because they do not have to go to a market which they may spend much time. Moreover, online shop has offered many types of goods that customer can buy, so they have many preferences to select the best ones.

Furthermore, nowadays, there have been many online shops which put some buyer testimonies on their websites. If customers feel worried about the quality of goods, they can see and read some testimonies concerning the quality of those goods. Therefore, with the presence of testimony, consumers can easily determine whether the quality of goods is decent or not.

In conclusion, online shopping has advantages and merits for many people. Thus, people should utilize online shopping as new lifestyle due to its benefits.

## J. MATERI PEMBELAJARAN

### 01 Definition

Hortatory exposition text is a type of text aimed at persuading listeners or readers that something should not occur or be undertaken.

### 02 Purpose

To persuade readers that something should or should not be the case.

### 03 Generic structures

- **Thesis** : Introducing the topic to be discussed in the text.
- **Arguments** : The supporting arguments for the writer's statement, and why certain actions should be taken.
- **Recommendation** : The writer gives recommendation to the reader.

### 04 Language features

- **Use Simple Present Tense (V1)**  
Example : cook, read, swim, eat, etc.
- **Using verbs to express thoughts**  
Example : feel, know, think, realize, etc.
- **Using Internal Conjunction**, such as :
  - Addition : besides, in addition, etc.
  - Comparisons : but, meanwhile, on the other hand, etc.
  - Time : firstly, second, then, next, etc.
  - Cause – effect : as a result, so, the result, etc.

**Smoking Public**

**Thesis**

A lot of people, especially teenagers, who do not smoke, always want to try smoking. They know it is bad for them and all, but it is just something they want to try. So they ask one of their smoker friends for a cigarette. Admittedly, they firstly can not light it on their own so they ask his friend to do it. Then they inhale that cigarette and smoke occasionally.

**Argument**

Apparently that makes them the born smokers. Now they do smoke fairly regularly. They can not avoid smoking and they enjoy too. They have smoker friends. Everyday they bring a pack in their pocket. For them, a pack of cigarette is as important as a wallet for their money.

**Recommendation**

Suddenly, for certain reason, they realize the fact that tobacco is the cause of a long list of nasty diseases. It is not only heart disease, stroke, and chronic lung disease but also bladder, lung, and pancreatic cancer. Even it was reported that around 400,000 Americans died each year. It was one every 80 seconds from tobacco-related illnesses.

Then they decide it is stupid to harm selves. They want to quit smoking. Unfortunately, they find that quitting smoking is so difficult. "Why can't I stop smoking? I really want to stop it". It is hard to quit because nicotine is powerfully addictive. Cigarette is one of the most efficient drug-delivery devices ever devised. As result, when people try to quit smoking, they often experience classic nicotine withdrawal symptoms such as anxiety, irritability, headache, depression, and restlessness.

Well, still want to try smoke? Think the facts before trying! If you are not smoker, you should never and never try to smoke.
